# HTC Products names new Sales Director

**Fair Haven, MI** – HTC Products, Inc. has announced that as of December 13, 2010, Steve Kuhr will assume the position of Sales Director. Mr. Kuhr will direct the international sales activities of HTC's various brands of power tools and workshop accessories. This is a position Mr. Kuhr has been in before at HTC, so there is a strong continuity expected in this transition. Previously in 2005, when the ownership of HTC changed hands, Mr. Kuhr held the position of National Sales Manager until 2008.

Most recently Mr. Kuhr was the Sales Director of PTM Corporation, an automotive metal stamping manufacturer under the same ownership, and co-located on the Russell Industrial Campus with HTC. The General Manager of HTC, Mark Cross noted, "Steve's addition brings the right knowledge and experience with both the power tools and the hardware industry that HTC can use to grow our business to the next level. He has the 3 key qualities we wanted in a sales leader; depth of understanding of our customers, management skills to align the global teamwork, and the technical experience needed to demonstrate the engineering features of our innovative tools."

Mr. Kuhr, his wife and two children live in Fair Haven, Michigan. Additional information about the HTC family of brands is available at [www.htcproductsinc.com](http://www.htcproductsinc.com). Should you have any inquiries about HTC, please call 800-624-2027.

- Background -

HTC Products, Inc. was founded in 1980 and is best known as the company that put the workshop on wheels. As the originator of custom engineered mobile bases for heavy wood and metal working machinery, these products provided space saving practicality to every professional shop and school. Today HTC's product line includes 5 brands of power tools and accessories that are available internationally. In 1985 HTC developed the Portamate brand to reach a broader segment of tradesmen and Do-It-Yourself consumers with hardware products that are sold through a wide network of distributors and retailers. In 2009, HTC added the Triton brand of precision power tools that are internationally recognized for award winning routers and woodworking innovations.
